

```
std::vector< layer >
```

```
graph BT; mse[mse::net] --> qp[qp::net]; qp --> vec[std::vector< layer >];
```

A diagram illustrating a class hierarchy. At the bottom is a gray box labeled 'mse::net'. A blue arrow points upwards from 'mse::net' to a white box labeled 'qp::net'. Another blue arrow points upwards from 'qp::net' to a white box at the top labeled 'std::vector< layer >'.

```
qp::net
```

```
mse::net
```
